MEMORANDUM FOR: Assistant Deputy Director for Support

FROM

: Chief, Security Staff, Office of Logistics

SUBJECT

: Proposal for the Creation of an OTR Seminar for Prominent Officers of American Corporations and Selected Academicians to Improve CIA's Public

Image

- 1. Since my brief conversation with you some weeks ago I have most informally discussed the contents of the attached memorandum with several interested components. The response has been encouraging. Quite unofficially a draft of my memorandum was sent to the Director and Deputy Director of Personnel. The attached routing sheet contains their comments.
- 2. I would like to stress that this suggestion has not been coordinated with or evaluated by the Offices of Logistics or Security. Your attention to this matter is sincerely appreciated.

- 1. During the recent running of Intelligence Review Course #11 several speakers notably Col. White and Mr. Karamessines voiced concern of the Agency's image as portrayed in recent newspapers and magazine articles. Col. White observed that the Agency's image might be improved through better contact with American educators and businessmen. In paragraph four of this paper I have outlined a proposal for implementing Col. White's suggestion.
- 2. My official assignment and duties necessitate frequent contact with many influential scientists, academicians, and senior corporate officers. I am convinced that the successful businessman and the intelligentsia on campus and in private research organizations are for the most part highly sympathetic to the aims of and reasons for CIA's existance. This opinion is further substantiated by the large number of contractors, universities, and consultants performing a multitude of tasks for various Agency components in a highly successful and secure manner.
- 3. These personalities are contacted on the basis of potential contributions to the intelligence community. They may meet a variety of Agency officials including contract negotiators, technical officers, contact personnel, and security officers. Their briefing and the resultant impressions of CIA depends to a large extent on the purpose of the contact, the time involved, and the personality and ability of their Agency contact.
- 4. I propose that the Office of Training develop a professional briefing that can be given at Headquarters Building in seminar fashion for carefully selected and influential contractors, corporate officials, businessmen, and educators. (Note: Depending on the acceptance and success of these seminars newly elected members of Congress might at a later date be included). This seminar would be expected to last one day. It would be limited to information no higher than the Secret level but would include for example a broad organizational picture, a review of CIA's charter, the congressional controls imposed on the Agency as well as some of the problems faced by the intelligence community operating within the framework of a democracy. Time might also be devoted to our various recruiting problems and our early retirement program. A sterile and security approved presentation of a successful but completed operational activity would no doubt impress "our guests". All questions and answers would be off the record and limited by security considerations.

- 5. The demand for a better public image certainly necessitates bold and imaginative steps in this direction. However, other problems facing the Agency such as placement for early retirees, technological and scientific advances to name a few require that we take positive action to present the Agency's position to influential officials outside of government circles in a professional, skillful, and secure manner. The use of seminars and briefings is universally recognized and has become a part of American industrial techniques. The wide use of this device by other government agencies is typified in the attached copy of a recent press release.
- I would propose that the initial seminar be limited to twentyfive individuals, with various Agency components submitting names of possible candidates. At the outset we might prefer to invite cleared and witting corporate officers. The Office of Logistics has a large stable of cleared contractors and could assist in the selection for a pilot program. However as the program developed selections would not be limited to people who are now in close liaison with CIA officials. In fact we would encourage nominations of personalities we are seeking to cultivate. The Office of Training would be charged with the responsibility of preparing charts, and assembling the panel of speakers. must be assumed that a significant number of attendees would be of sufficient stature to demand an appearance by the Director, the Deputy Director and/or the Executive Director. The officer responsible for this project would be required to make some preliminary inquiries as to the success and direction of the Office of Personnel's recruitment program. Suggestions and comments should also be solicited from DD/S&T as well as the Office of Contacts.
- 7. The matter of a firm agenda, conference room space, food, the means to be employed in contacting nominees and like details would need coordination and detailed study. However, I believe that the time expended and the nominal costs involved would reap rich dividends some of which are listed as follows:
  - a) Improve the Agency's public image with influential people
  - b) A more receptive atmosphere for contact and recruitment personnel
  - c) Opening of new avenues of approach for out placement and early retirement cases

BACK TO BOOKS-This group of men is going to school here this week to learn more about how to do business with the Government, which is the Nation's biggest single customer. As Government defense contracting grows in size and complexity. there is a growing demand among contractors for information on Government procurement procedures. The seminar was held at the International inn.

## Firms Trek to Class To Learn U.S. Need

For thousands of American companies, the important facts of life these days are that the Government is their biggest customer and that to survive and thrive they must understand Government procurement procedures.

Growing Federal expenditures on military hardware and research and development are accompanied by a proliferation, of seminars, courses and schools on how to do busion Most defense procurement ness with the Government.

Department of Defense with its heavy emphasis on sophisticated management techniques and delivery-time risks, too, intend of the Covenment has forced many small busi-instead of the Government ressmen, and some big ones assuming all of them as often too, to go to school to find out happened under cost-plus conwhat's going en.
